CBRE Global Investors divests EUR 180 million residential portfolio to Round Hill Capital

De Brauw Blackstone Westbroek has assisted CBRE Global Investors on the EUR 180 million divestment of a large residential portfolio to UK private-equity firm Round Hill Capital .

It is the largest transaction of its kind in the Netherlands since the financial crisis. The Dutch residential market has always attracted US and UK private-equity firms that focus on distressed assets. This is, however, the first major inflow of international capital into the Dutch residential property market, traditionally dominated by domestic investors.
